

A SOUND EFFECT ON PEOPLE

Saint-Gobain Ecophon develops, manufactures and markets acoustic solutions that contribute to a good working environment by enhancing people's wellbeing and performance.

Our promise

"A sound effect on people" is the core backbone of everything we do.

Analysed data from 142 buildings and 23,450 occupants shows acoustical satisfaction as having the lowest rating in LEED™ - Post Occupancy Evaluations.

Indicating from 'a reasonable amount' to 'a lot', respondents noticed the following sound sources:

Ventilation

Colleagues talking on the phone

Sounds from teams working further away

Talking, laughing, people close in the same room

Talking, laughing, people far away in the same room

UtilityCompanyHQ.

It takes an average of **15 minutes to regain concentration** after being distracted from a difficult task by unwanted noise.

Google.

RSJ.

With just 5 distractions over an 8 hour day, this equates to a 15% reduction in productivity.

In a company of 200 staff this is equivalent to 30 people being paid to do nothing.

Britons have some of the longest working hours in Europe, with one in five spending more than 45 hours a week in the office.

“We specified Ecophon because we knew their systems were easy to work with, and that we could trust them. We were able to reduce the reverberation in the existing building, from four seconds to below two seconds, for its new use.”

Richard Bassett
LSI Architects LLP

“How well office environments support both collaboration and concentration is fundamental.

Understanding how acoustics can support or hinder these work modes is an essential building block to a successful design solution.”

Paige Hodsman

Concept Developer (Office), Ecophon UK & Ireland
