BRIGHTENING THROUGH FERMENTATION

The key to future-proofing your skin!

Between the ages of 25 and 30, we start to lose around one percent of collagen every year as part of the natural aging process. The aim of collagen banking is to maintain and grow collagen supply during prime collagen-producing years.

The most abundant protein in the body, collagen, is made by fibroblasts. Its main function is to create and maintain the structures of the tissues that form the body, generating resistant, strong and flexible fibres, known as collagen fibres.

Methods of collagen banking include taking collagen supplements and introducing a collagen-rich food diet, but topically, using skincare products that stimulate fibroblasts and prevent collagen degradation can aid in ensuring youthful skin longevity!

View our collagen-stimulating ingredients:

BergaCare AquaLipids Melon BK

An innovative delivery system to easily incorporate highly appreciated active oils into various cosmetic formulations. Kalahari melon seed oil contains a high proportion of linoleic acid, which helps the skin maintain its hydration, while bulbine frutescens leaf juice boosts collagen synthesis and has wound healing properties.

INCI: Aqua, Citrullus Lanatus Seed Oil, Bulbine Frutescens Leaf Juice, Glycerin, Cetyl Palmitate, Glyceryl Behenate, Pentylene Glycol, Copernicia Cerifera Cera, Sodium Stearoyl Glutamate, Tocopherol, Helianthus Annuus Seed Oil, Citric Acid

Sirhamnose® SC

A bioavailable rhamnose derived, firming active to combat sagging skin. Sirhamnose® SC is capable of stimulating the ability of fibroblasts to produce collagen I for denser and firmer skin. This will increase the number of collagen fibres in the extracellular matrix.

INCI: Silanetriol, Rhamnose, Propanediol, Citric Acid, Water

CollaPlant Z NPNF®

Vegetable alternative to animal collagen specifically designed to provide comparable amino-acids composition and sensory profile of hydrolysed collagen.

INCI: Hydrolysed Soy Protein & Rice Amino Acids & Hydrolysed Adansonia Digitata Seed extract & L-Proline

Scutaline

A 100% natural anti-'zombie' cell active with inflamm'aging activity. Scutaline delays senescence occurrence by maintaining skin's natural defence to prevent collagen degradation.

INCI: Scutellaria baicalensis root extract

The Power of Peptides!

The skincare buzzword that's worth the hype

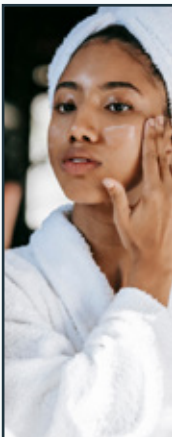

Peptides had a resurgence in 2024 due advanced technology that allowed us to use plants for the production of biomimetic molecules. They are short chains of amino acids that are building blocks of proteins like collagen and elastin, and are naturally found in the body.

Compared to proteins, which have an amino acid number of 40+, peptides have a smaller molecular weight range with 2-40 amino acids. Unlike proteins, peptides penetrate skin better. Their smaller molecular size prevents film formation.

Peptides are frequently highlighted in all types of personal care applications, including skincare serums, suncreams, shampoos, lip balms, and even makeup.

Our comprehensive range of peptides target specific areas such as face & eye contour, skin firming, collagen boosting, dark spot correction, hair thickening and an overall even skin complexion.

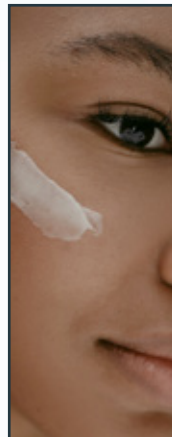

Check out some of our most popular products below:

NaturePep™ Teff

Natural peptide designed to revitalise collagen for ageless skin! NaturePep™ Teff increases skin firmness, elasticity and tonicity as well as diminishes nasolabial fold volume and wrinkle depth.

INCI: Water & Hydrolyzed Eragrostis Tef Seed Extract

Prolistin

A peptide technology for a 360° action on eye contour, from L-Proline and L-histidine obtained by fermentation. It acts as a free copper chelator to reduce droopy eyelids, wrinkles, eye bags, and dark circles.

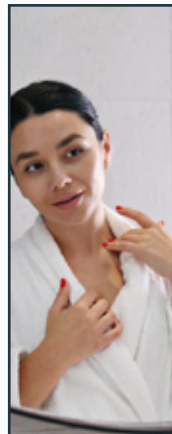

INCI: Prolinamidoethyl Imidazole & Butylene Glycol & Water

NaturePep™ Amaranth

Natural plant peptide from the ancient grain, Amaranth. Provides hair thickening properties as well as adding gloss and shine for healthier looking hair.

INCI: Water & Amaranthus Caudatus Seed Extract

Chronocyclin

An anti-aging chrono-dipeptide that mimics sun exposure activation of the circadian genes, to optimise the skin's physiological activities of defence and cell regeneration.

INCI: Glutamylamidoethyl imidazole

Quench Your Skin's Thirst!

Powered by HyaClear® 7, The Ultimate Solution for Superior Hydration!

As a gold standard in skin moisturisation, hyaluronic acid is known to provide varying degrees of benefits depending on its molecular weight.

HyaClear® 7 from TRI-K Industries is an optimised blend of seven unique molecular weights (ranging from 3,000 to 2,300,000 Da) of sodium hyaluronate, designed to provide maximum moisturisation to the skin.

The medium-high molecular weight form a protective film to reduce water loss and enhance skin barrier function, protecting it from dehydration. The low molecular weight penetrate in the epidermis and with continuous use will:

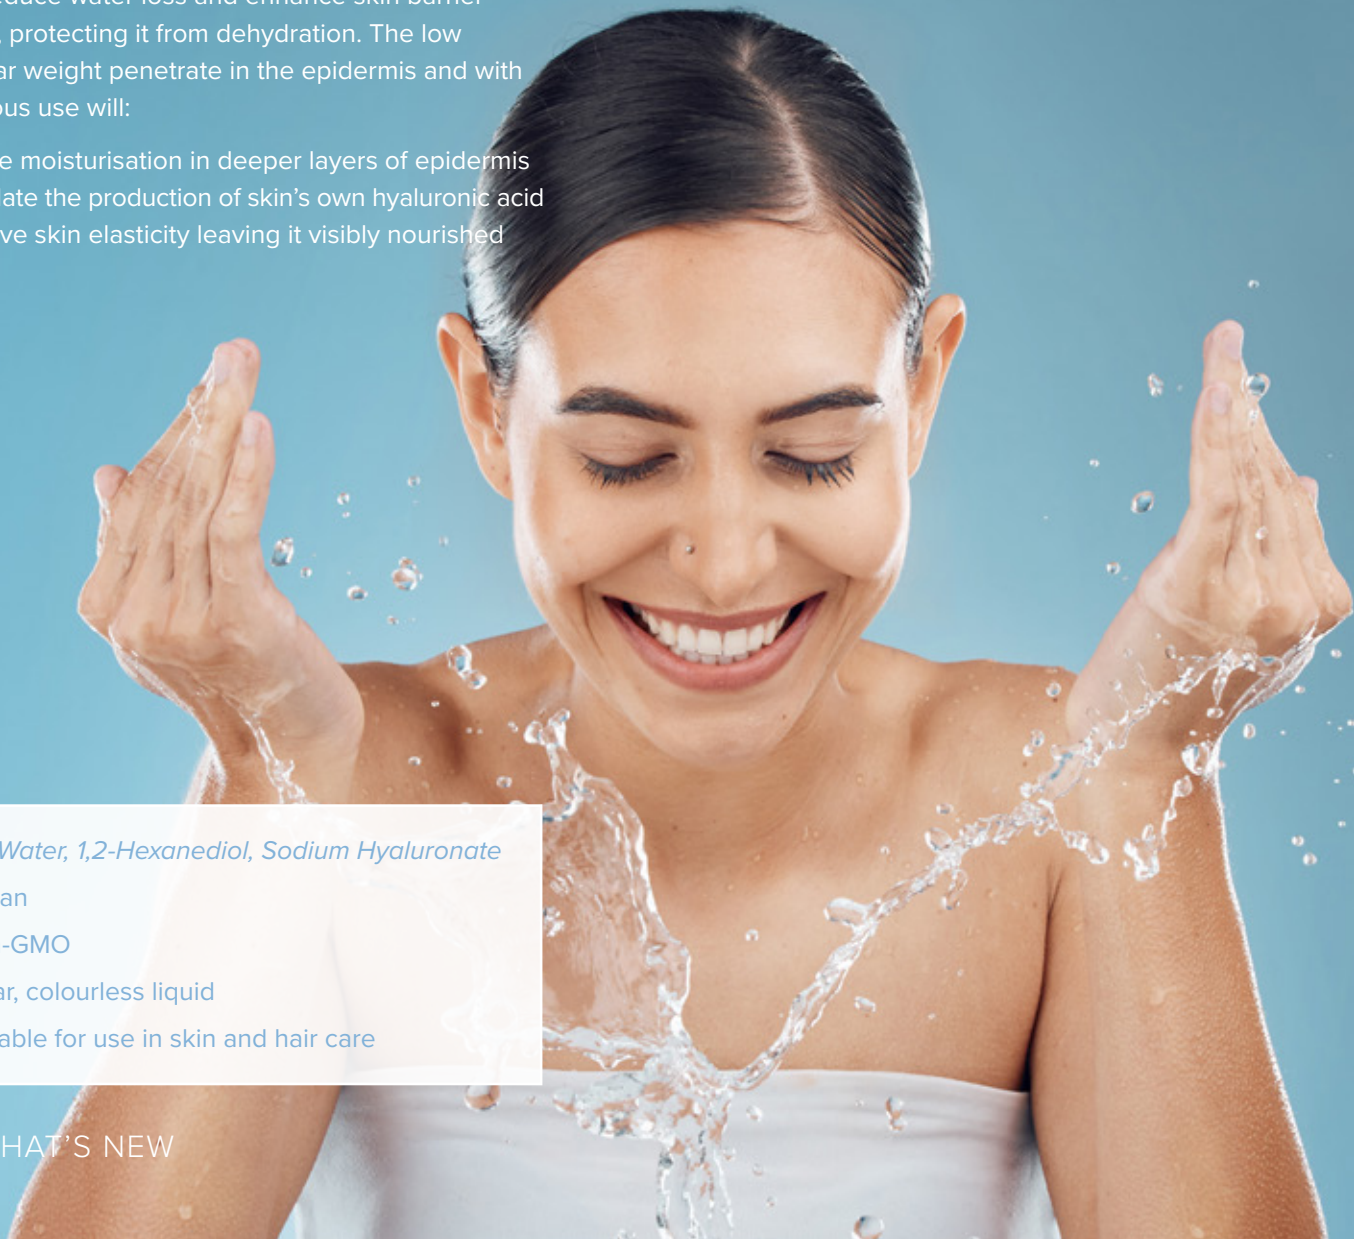

- Ensure moisturisation in deeper layers of epidermis
- Stimulate the production of skin's own hyaluronic acid
- Improve skin elasticity leaving it visibly nourished

In-vivo clinical studies carried out by TRI-K Industries found:

- HyaClear® 7 immediately reduced TEWL after 30 minutes & maintained a protective barrier to water loss after 24 hours.
- HyaClear® 7 visibly improves skin's moisture levels in only 30 minutes after single application.
- Even after 24 hours, HyaClear® 7 continues to boost hyaluronic acid in the stratum corneum.

INCI: Water, 1,2-Hexanediol, Sodium Hyaluronate

- Vegan
- Non-GMO
- Clear, colourless liquid
- Suitable for use in skin and hair care

Teenage Skincare

Our range of gentle and effective ingredients suitable for tween and teenage skin.

From the age of 10, all through the early 20s, tween and teenage skin undergo many changes that can cause skin issues. Adolescents will typically struggle with acne, blackheads, dry skin, irritation, and other skin concerns, often caused by hormonal changes during puberty.

Starting as early as 7 years old, the body begins to produce the hormones that are responsible for the changes of puberty. The change in these hormones may result in the sebaceous oil glands becoming over active and producing increased sebum, which mixes with dead skin cells to plug hair follicles and promote oily skin –as well as acne and other blemishes.

We recommend the following ingredients to tighten pores, soothe skin, and hydrate without the heaviness:

Adenosilane

Designed to tighten pores from the inside, revitalising the pore sheath to retain its grip and prevent loosening. Obtained by fermentation method.

INCI: Silanetriol & Adenosine

Inflammox™ Plus

Inflammox™ Plus provides potent antioxidant and anti-inflammatory activity making it an ideal choice for a variety of applications, especially skin soothing formulations.

INCI: Vaccinium Macrocarpon (Cranberry) Seed Oil, Rosmarinus Officinalis (Rosemary) Leaf Extract, Curcuma Longa (Turmeric) Root Extract, Zingiber Officinale (Ginger) Root Extract

HyaClear®7

Supercharged hydration! HyaClear®7 is an optimised ratio of 7 unique molecular weights of hyaluronic acid for superior skin moisturisation.

INCI: Water, 1,2-Hexanediol, Sodium Hyaluronate

Defending Roots, Defying Hair Loss

**99% naturally derived bioactive
ingredient, powered by plant
stem cell exosomes**

NEW from TRI-K Industries, DensiFoll™ is a 99% naturally derived bioactive powered by plant stem cell exosomes enriched with small RNA and hydrolysed rice protein.

This innovative ingredient stimulates key genes responsible for hair growth, to promote denser, thicker hair, whilst supporting a healthy scalp environment. It harnesses the synergy of malva extract with hydrolysed rice protein, making it ideal for formulations designed for thinning hair.

DensiFoll™ also has data on In-Vivo Eyebrow Assessments, concluding that eyebrow density increased by 14.69% after 8 weeks of application twice a day.

Key Features:

- Gluten Free
- RSPO
- Reach Compliant
- Non-GMO
- COSMOS Approved

INCI: *Glycerin, Malva sylvestris (Mallow) Flower/Leaf/Stem Extract, Hydrolyzed Rice Protein*

A Synergistic Effect For Skin Revitalisation

Skin Vitality For Better Face Definition!

NEW from Exsymol: Alistisilane protects from glycation and promotes vascular system recovery!

As with all of Exsymol's silanol range, the ingredients optimise silicium, known as the skin architect, to create a bioavailable silanol technology and combine it with a peptide for enhanced cosmetic benefits!

Alistisilane synergistically blends the power of carbinine with bioavailable silicium. Carbinine is an excellent alternative to carnosine, which is often deactivated by enzymes when applied topically.

Carnosine provides stability and protection of collagen fibres from glycation. It also protects endothelial cells from senescence, making the combination of silicium and carbinine the best ally for skin vitality.

Alistisilane has a 2-step mode of action to target skin revitalisation!

Step 1 focuses on anti-glycation detoxification, which protects skin proteins from reticulation. This means skin keeps its elasticity, density and colour.

Step 2 targets matrix restructuring to achieve a restructured dermis and enhance revascularisation. Alistisilane increases fibronectin content which is involved in cell adhesion, cell migration and cell-to-cell communication, resulting in strengthening skin structure alongside collagen fibres.

In Vivo Results:

5% Alistisilane applied twice a day to 30 women for 56 days resulted in:

- -10% jowl ptosis
- -9% wrinkle volume
- +43% healthy glow effect
- +7% elasticity

Key Features:

- NOI: 99.1%
- Water Soluble
- Recommended use level: 5%

INCI: *decarboxy carnosine HCl, silanetriol, propanediol, water*

Multi-Functionals for Men

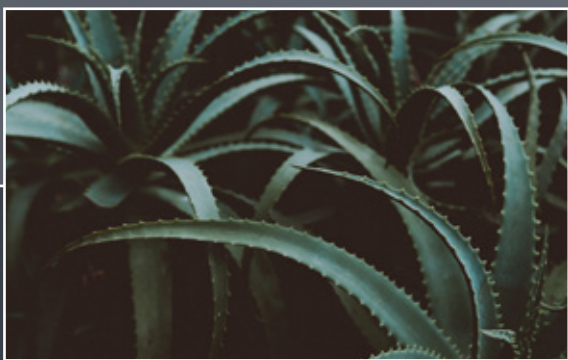

Discover Soothing & Strengthening Actives for Male Skin & Hair

In recent years the Personal Care industry has seen several launches of male celebrity and influencer-owned skincare brands. Examples include Humanrace from Pharrell Williams, S'ABLE LABS from Idris Elba and LOVED01 from John Legend.

Traditionally the male grooming market was hard for brands to breakthrough, due to male consumers' reluctance to try new products, but thanks to social media platforms like TikTok, male influencers are able to easily share their grooming routines and introduce consumers to new brands.

Particularly in the younger generations, Gen Alpha and Gen Z are using social media platforms to learn grooming tips and tricks, creating opportunities for brands to position themselves as a staple in daily routines.

Check out our performance-driven ingredients, ideal for male grooming:

Vivify™ Plus

An anti-oxidant and anti-pollution active for hair and skin featuring sustainably harvested leaves from *Myrothamnus Flabellifolia* and *Aloe ferox* sourced from the cape of South Africa.

INCI: *Propanediol & Myrothamnus Flabellifolia Leaf/ Stem Extract & Alcohol & Aloe Ferox Leaf Extract*

D.S.B.C® SP2

Soothing and anti-inflammatory active for premium skincare products. Combines organic silicon with salicylic acid to provide protection against anti-aging and other environmental irritations. Suitable for anti-pollution products as well as pre and post-shave products.

INCI: *Silanediol Silicylate*

Hemp Tein Z NPNF®

Sourced from recycled hemp seed biomass, Hemp Tein Z NPNF® is designed to protect and strengthen the skin and hair from external biological & environmental irritants. It restores epidermal homeostasis, promoting more vibrant and healthier skin.

INCI: Hydrolyzed Hemp Seed Protein

TRglyphix® Sense

A powerful solution for reducing discomfort and redness caused by skin irritation, particularly from physical aggressors like shaving. Clinical data demonstrated a 90% reduction in redness within one week of using a leave-on skin treatment containing 5% TRglyphix® Sense.

INCI: Hordeum Vulgare Seed Extract

The Ultimate Glow-Up

The “glazed donut” or “glass skin” trend, emphasizing a dewy and luminous complexion, is continuing into 2026. This popular skincare trend reflects the ongoing desire for glowing skin, seen as a key indicator of overall health.

Minimalist makeup looks, inspired by figures like Hailey Bieber and Pamela Anderson, have shifted the focus from faking a glowy base with makeup, to creating demand for skincare that achieves a naturally radiant complexion.

Our wide variety of glow-boosting active ingredients helps consumers achieve an even complexion and radiant skin.

Albatin® CB

Nicknamed ‘The Glow Keeper’ this peptide treats and prevents melanogenesis by stabilizing DOPAchrome. Albatin® CB is effective at lightening the complexion and preventing the appearance of age spots.

INCI: *Aminoethylphosphinic Acid, Butylene Glycol, Citric Acid, Water*

Fision® GlowPlex

A multi-functional skincare active providing efficacious skin glow benefits such as enhanced skin radiance, minimizing appearance of dark spots and hyperpigmentation, blurring of skin imperfections, and supporting even, homogenous skin tone over time.

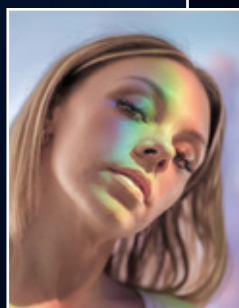

INCI: *Water, Niacinamide, Pisum Sativum (Pea) Extract, Chenopodium Quinoa Seed Extract*

Fision® PentaFruit V

Fision® PentaFruit V contains five natural plant extracts and alpha hydroxy acids to promote healthier, younger looking skin. It effectively rejuvenates cells for smoother, fresher skin!

INCI: *Water, Lactic Acid, Glycolic Acid, Vaccinium Myrtillus Fruit Extract, Saccharum Officinarum (Sugarcane) Extract, Citric Acid, Citrus Aurantium Dulcis (Orange) Fruit Extract, Citrus Limon (Lemon) Fruit Extract, Acer Saccharum (Sugar Maple) Extract, Tartaric Acid & Malic Acid*

Alistin® SC

Known as a multi potent detoxifier, Alistin® SC repairs cells and structural fibres damaged by toxic forms and stops the vicious cycle of glycoxidation. With peptide technology, Alistin® SC offers an innovative approach for an optimal glow by preventing vascular senescence to restore healthy glow with a metabolic boost for visible and lasting results.

INCI: *Decarboxy Carnosine HCL, Propanediol, Water*

KOSTER
KEUNEN

Plasticiser Waxes in Personal Care

Fix unwanted graininess, crystallisation, and thermal stability without affecting overall texture!

In personal care, plasticisers are used to create and promote durability, plasticity and flexibility. They also create creamy textures in high wax content formulas and can fix a myriad of formulation challenges.

Plasticisers can fix graininess that occurs when solids migrate and agglomerate. They stop spontaneous crystallisation in formulas with high percentages of butters, otherwise known as “seeding”. They can fix thermal stability issues by increasing melt point, without affecting the overall texture.

Kester Wax K82P

Kester Wax K82P will raise the melt point of your system without creating structure or hardness. This chemistry can add creaminess and consistency to all types of systems. It can also be used in emulsions to boost film forming and SPF properties.

Melting point: 78-84°C

INCI: Synthetic Beeswax

Kester Wax K60P

Kester Wax K60P is a soft and pliable wax naturally derived from castor oil. K60P is ideal for creating creamier textures while increasing the stability of your product.

Melting point: 50-70°C

INCI: Polyhydroxystearic Acid

K82P and K60P are both primarily plasticisers, however their chemistries are distinctive. Their unique characteristics offer beneficial synergies in formulation.

When combined, Kester Wax K82P can be used to achieve higher melt points and flowable gels, while Kester Wax K60P will add mid range melt point stability, creamy textures and slight firmness to the overall formula. By using a combination of both chemistries, a variety of different textures are possible.

Brightening through Fermentation: Niacinamide Redefined

Next generation of low-irritation, high-performance niacinamide, obtained through advanced bio-fermentation.

NEW from TRI-K Industries, NiaPure™ is an expertly crafted low-irritation niacinamide, proven to gently even skin tone, regulate sebum, and visibly reduce hyperpigmentation.

Developed through advanced fermentation technology and an exclusive technique to significantly enhance bioproduction efficiency, it delivers patented high purity and diminishes nicotinic acid for unparalleled skin comfort. With 5x less nicotinic acid compared to standard niacinamide, NiaPure™ minimises melanin production while reducing irritation, making it ideal for sensitive and reactive skin.

With studies on in-vitro melanin reduction, cellular viability, purity, and irritation assessments, TRI-K's NiaPure™ promises to brighten and even skin tone, whilst regulating sebum production for balanced healthy skin!

Key Features:

- Vegan
- Palm Free
- Non-GMO
- Gluten Free
- Reach Compliant
- Sensitive Skin Approved

INCI: Niacinamide
