

INTRODUCING HYACLEAR® 7

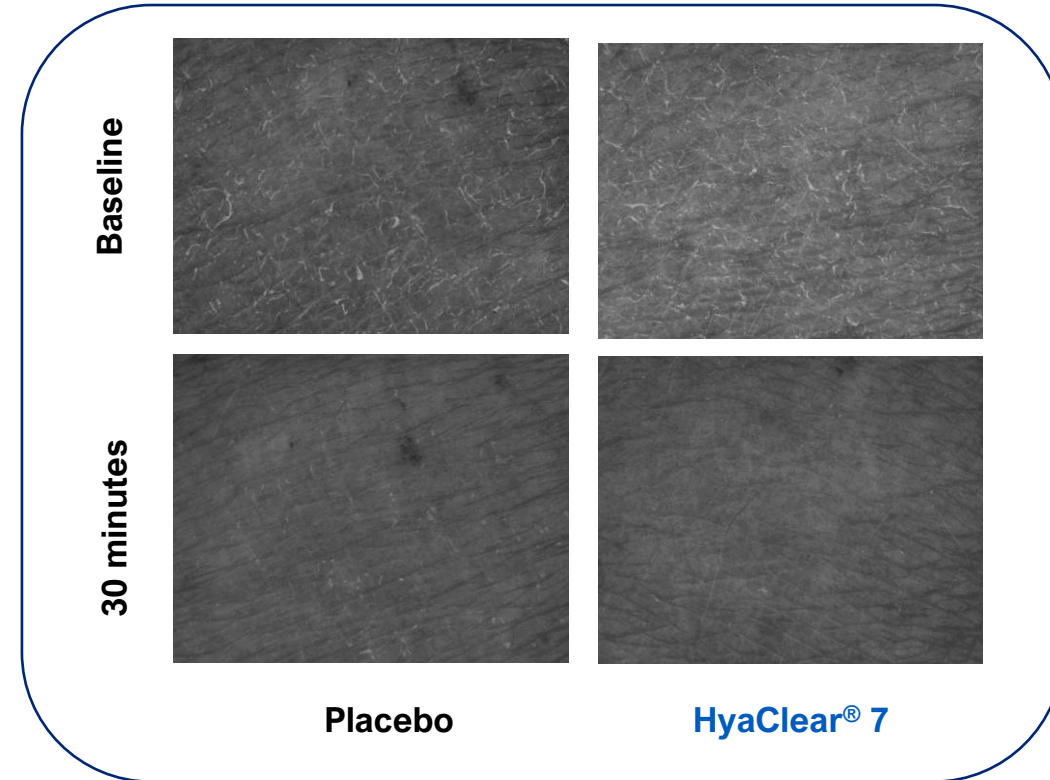

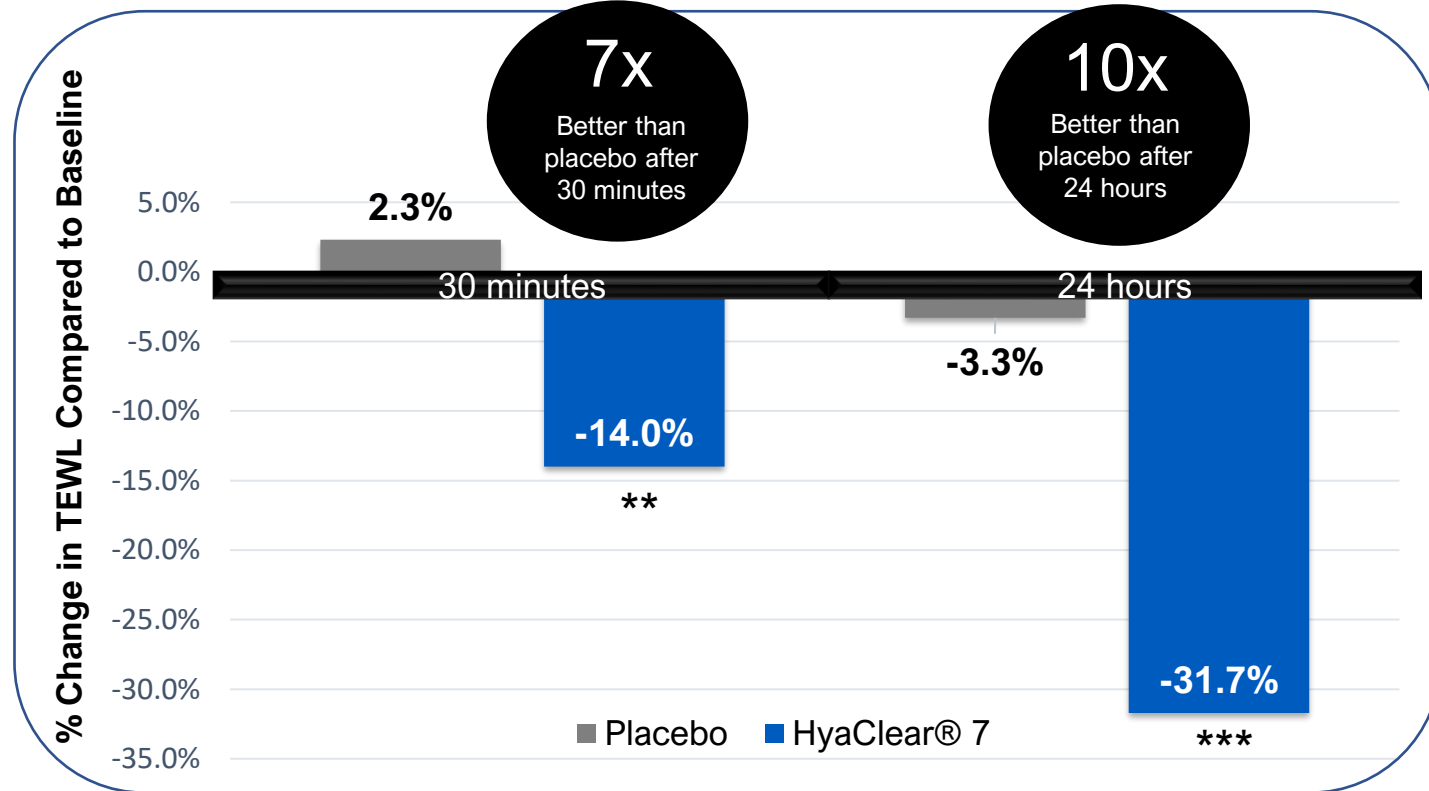

The Supercharged Moisturizer

- INCI: Water, 1,2-Hexanediol, Sodium Hyaluronate
- HyaClear® 7 is an optimized ratio of **seven (7) unique molecular weights** (range of 3,000 – 2,300,000 Da MW) of sodium hyaluronate that:
 - Provides **maximum moisturization** to the skin
 - Ensures **multi-functional benefits** after single application
 - With continuous application, HyaClear® 7 can stimulate skin to produce **more hyaluronic acid** for **deeper moisturization** and **younger looking skin**

IMMEDIATE AND LONG-TERM MOISTURIZATION

HyaClear® 7 immediately reduced TEWL after 30 minutes from single application & maintained a protective barrier to water loss after 24 hours.

HyaClear® 7 visibly improved skin after single application, showing visibly smoother and more nourished skin vs. baseline/placebo.
