Training & Development

Qualified for Quality

Further training and qualifications that our engineers and workers achieve includes:

- Asbestos awareness

- Working at height and access equipment

- On site safety and supervision

- Scaffold working

- Confined and permit-required spaces working

We encourage our operatives to undertake further training within their chosen fields, gaining additional qualifications. This empowers our workers, and enhances their skills not only here at AP Mitchell, but throughout the entirety of their careers.

Keeping On Top

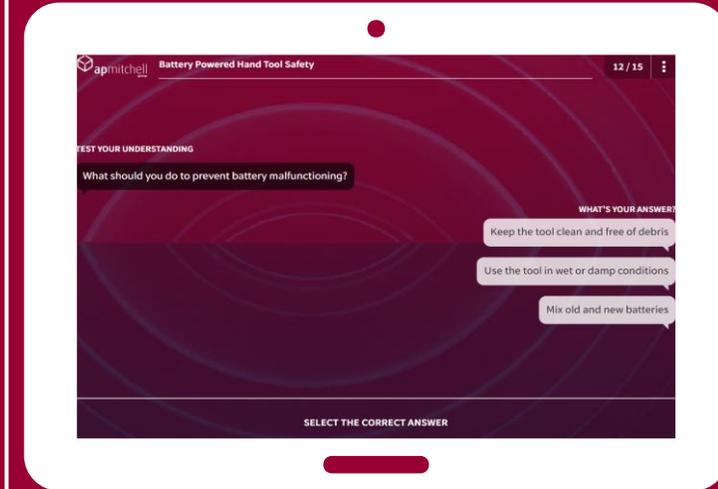

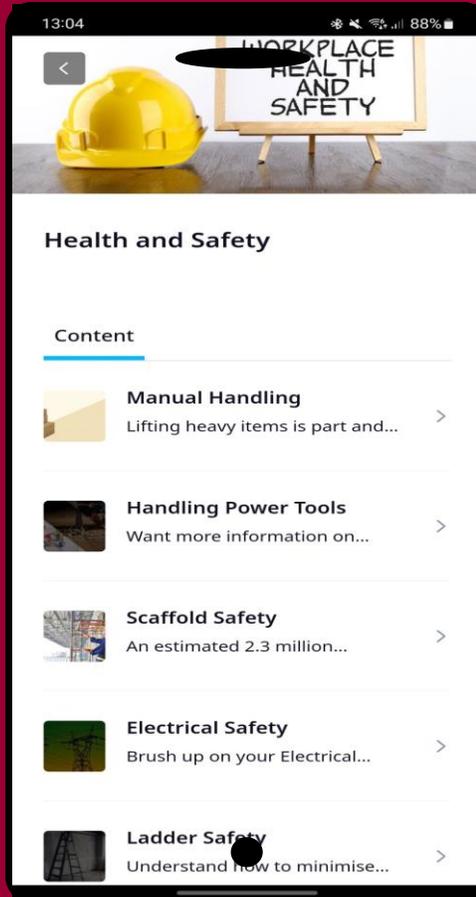

AP Mitchell is making use of the latest apps to deliver refreshing toolbox talks directly to our engineers.

These can be used to top up their skills and knowledge whenever required to ensure our operatives are always at their best.

These toolbox talks can be accessed on a phone, tablet or computer, and enables us to keep all our operatives refreshed and ready.

This gives our clients peace of mind, and helps our engineers consolidate on their learning.

These talks cover a suite of health and safety skills, from mental health to confined spaces working.

Levelling-Up our Sector

These interactive talks are also to be made available to our partners and subcontractors across the supply chain.

This helps promote a culture of cooperation and raises the standards within our sector.

Subcontractors who have undergone our training course will be awarded with a certificate of approval as proof of completion of this training.
