

Technical Data Sheet

ECOFLEX 1.5 ADH Synthetic Membrane

| | |
|---------------------------|---|
| Description | ECOFLEX 1.5 ADH is a lightweight, flexible PVC-p single-ply synthetic membrane with polyester mesh reinforcement and non-woven polyester fleece backing of 200g/m ² . It is available in dark grey (RAL 7043). |
| Use | Roof waterproofing, suitable for new build or refurbishment projects, in fully-adhered exposed, loose-laid and ballasted, inverted, roof garden and living roof specifications. |
| Properties | ECOFLEX systems provide excellent mechanical properties and resistance to wind stress, puncturing, hot/cold cycles, weathering and UV rays. However, the membrane is not resistant to bitumen. It is easily welded by hot air and has excellent flexibility at low temperatures. ECOFLEX PVC roof waterproofing membranes are manufactured to ISO 9001 and ISO 14001. |
| Application method | ECOFLEX 1.5 ADH is fully bonded with Axter ADH membrane adhesive. Installation must be carried out by Axter accredited skilled operatives. The roof deck must be smooth, clean and free of sharp edges or foreign substances. All ECOFLEX membranes should not be installed in wet weather conditions or in temperatures below 5°C. When installing over an uneven surface or to eliminate direct contact between the ECOFLEX ADH membrane and oil based products, such as bitumen membranes, a suitable separation layer should be installed (ECO/200 PY Separation Layer). The ECOFLEX ADH membrane is fully adhered to the substrate with Axter ADH adhesive or is loose laid. Side and end laps are sealed by the hot air welding technique. Hot air welding techniques can be adapted to suit the specific climatic conditions at the time of installation to ensure a secure weld is achieved at all times. |

Storage

Rolls to be stored horizontally and parallel (never crossed) in original packaging in a dry, cool place.

| Characteristics | | Standard (BS) | Units | Values |
|---|--------------------|-----------------|-------------------|--------|
| Dimensions | Length | BS EN 1848-2 | m | 20 |
| | Width | BS EN 1848-2 | m | 1.60 |
| | Thickness | BS EN 1849-2 | mm | 1.50 |
| | Mass per unit area | BS EN 1849-2 | kg/m ² | 2.00 |
| Tensile strength (L x T) | | BS EN 12311-2 | N/50mm | ≥1100 |
| Elongation to break (L X T) | | BS EN 12311-2 | % | ≥15 |
| Static puncture resistance | | BS EN 12730 (A) | kg | ≥20 |
| Impact resistance (hard substrate) | | BS EN 12691 | mm | ≥ 800 |
| Joint peel resistance | | BS EN 12316-2 | N/50mm | ≥ 200 |
| Joint shear resistance | | BS EN 12317-2 | N/50mm | ≥ 600 |
| Foldability at low temperatures | | BS EN 495-5 | | ≤ - 25 |
| Dimensional stability | | BS EN 1107-2 | % | ≤0.5 |
| Artificial ageing due to prolonged exposure to UV radiation high temperatures and water | | BS EN 1297 | Visual | Pass |
| Water vapour transmission properties | | BS EN 1931 | μ | 20 |
