Natural Wood Care

Our natural wood

Natural wood looks great in your home, and our flooring is easy to lay and easy to care for.

Here are our quick tips for keeping wood flooring looking fantastic:

Sweep or vacuum regularly – removing dust and dirt from your wooden flooring stops it from scratching the wood or getting stuck in the surface.

Protect against furniture – moving furniture can scratch your flooring. Pop pads on the underside of chair and table legs to keep your floor beautiful.

Remove water and stains quickly – although natural wood flooring is treated, you shouldn't

let water or spills remain on the floor. Clean it when you see it to maintain your flooring.

Protect high traffic areas – using rugs and mats can help to protect scuffing and scratching.

Clean with wood flooring cleaner – it's always best to use a specialist cleaner rather than regular household cleaners. These are readily available and inexpensive.

You can get great care for your wooden floor with our **WOCA Clean and Care Kit**.
