About Wood Flooring

Furlong Flooring®
First choice flooring for every room

When it comes to flooring, solid, and engineered wood are popular options. Engineered wood flooring offers a wide range of plank lengths and widths, giving you plenty of choices to match your room's style and design.

At our company, we take pride in ensuring that all our wood ranges are compliant with UKTR regulations, and we make sure that our wood products are sustainably and safely harvested. Engineered wood flooring is made of real solid wood, with a top layer that is bonded to an engineered plywood base.

From traditional oak planks to distressed wood flooring that gives a room that extra dash of personality, our ranges are designed for easy fitting and cost-conscious pockets.
