

It may look **itentacle**...but our OSB4 panel
has **no added formaldehyde**.

Let's do the right thing!

with **SMARTPLY ULTIMA**

SMARTPLY ULTIMA is a high-performance OSB4 panel designed for the most demanding structural applications within construction. Possibilities are now even greater, with an engineered panel that offers enhanced moisture resistance and increased strength when compared to other typical structural panel solutions.

Manufactured using state-of-the-art technology, it is free from added formaldehyde. From a reliable resource of sustainable timber, it offers the ultimate sustainability credentials compared to alternative specifications. When you need a high performance, sustainable structural panel solution – **do the right thing with SMARTPLY ULTIMA.**
