

...choose **SMARTPLY
PATTRESS PLUS.**

SMARTPLY PATTRESS PLUS is a pre-cut, pre-rebated OSB3 board for use in 'C' shaped metal studs in the construction of partitions. Featuring a solid core, It enables secure anchorage for fixtures and fittings.

These **ready prepared** modular panels greatly speed up installation time as no cutting is required on site, meaning **less dust, less noise** and a reduced need for dangerous power tools.

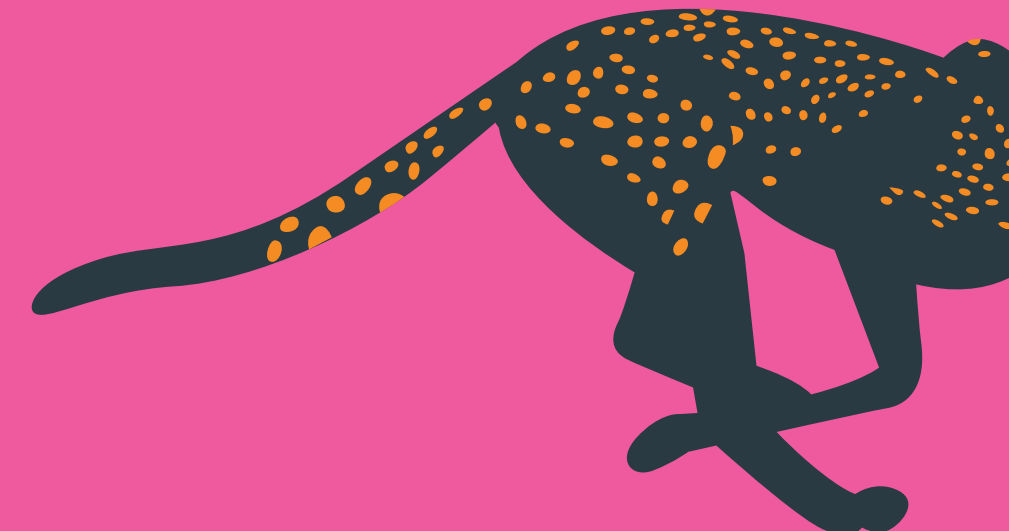

SMARTPLY PATTRESS PLUS is produced with **zero added formaldehyde** and using **fully certified timber** from our own forests, this combined with its speed and ease of use, makes it the perfect alternative for plywood for use in pattressing.

Manufactured in accordance with EN300, CE marked and FSC approved, **SMARTPLY PATTRESS PLUS** is a fully certified alternative to tropical plywood.

Technical data

Available Thicknesses	Available Widths	To Fit Stud Centre	Lengths
15mm or 18mm	397	400	1250mm or 2397mm
15mm or 18mm	597	600	1250mm or 2397mm

*some sizes and thicknesses available to order only.

Suitability

SMARTPLY PATTRESS PLUS is designed for use in non-structural metal frame drywall partition applications where the in-service climatic conditions and ambient relative humidity (RH) levels are similar to those expected in dry, sheltered construction environments.

SMARTPLY PATTRESS PLUS panels are available in thicknesses of **15mm** or **18mm**, widths of **397mm** or **597mm** (to fit **400mm** and **600mm** stud centres), and lengths of **1250mm** or **2397mm**, in line with leading plasterboard partition specifications.
